

„Tools which can be used to support management of natural resources in a health resort in a sustainable way“

During the 90 minutes knowledge-packed webinar you will learn:

- How to enhance the integrated system of healing resources with use of IT tools?
- What environmental aspects should be taken into consideration, when programming the additional development of SPA?
- How to coordinate the management from the perspective of different stakeholders?

TAKING  
COOPERATION  
FORWARD
